

MONITOR SPEAKER

MQ 50

Monitor speaker for installation at constant directivity

The MQ50 is a monitor speaker for constant directivity installation. It is a two-way speaker with 5" woofer and waveguide-loaded dome tweeter to ensure intelligibility and correct dispersion of the sound over a wide angle of coverage.

The built-in support makes the MQ50 easy to install and enables close fitting to the wall, limiting its protrusion.

The exclusive fixing system designed for the MQ50 model allows the installer to fit the fixing bracket to the wall and make the electrical connections during the pre-installation phase; subsequently, when all the works are completed, the MQ50 is positioned, oriented, and connected with a simple "click", without the need for tools. The speaker can be connected to constant voltage audio lines at 70 V or 100 V or to constant impedance lines (rotary switch positioned to 16 Ohm).
