

THE ADVANTAGES OF COMBISOUND®

The benefits of combining two systems in one in order to provide power and control with a maximum amount of features makes **COMBISOUND®** a guarantee of success. Different functions offering versatile audio and public address applications can be optimized by combining our sound systems with any public address systems

and **KNX**, the worldwide **STANDARD** for home and building control. As a result, users can enjoy its features in an easy and simple way. The System can be tailor-made to meet the specific design requirements of each building, its environment, its electroacoustic features and the level of operations required.
